

# Get more done in your day with Trellis AI

*Built for attorneys, by attorneys*

Trellis AI leverages Trellis' extensive data foundation and advanced language models to deliver precise insights that enhance decision-making, case preparation, and litigation strategy.

It streamlines strategic work like case assessments and motion argument development while automating time-consuming tasks such as motion drafting, client updates, and attorney matter preparation. These efficiencies free up attorneys to focus on strategy—ultimately driving higher ROI and delivering measurable firm-wide efficiencies.

## What problem is Trellis AI solving for?

Trellis AI is built for busy attorneys juggling cases, deadlines, and countless tools. Rather than adding complexity, Trellis AI simplifies your workflow, streamlining legal tasks and minimizing constant context-switching.

## Why choose Trellis AI?

Trellis AI is built upon the vast collective knowledge of the court system to produce proven work products that drive success. By leveraging Trellis' hundreds of millions of case motions and pleadings, Trellis AI delivers strategic insights and actionable recommendations.

### Powered by the largest state trial court database

The only AI built upon Trellis' unparalleled data and expertise

### One-click work product

Intuitive, one-click tools - no prompt writing or complex commands needed

### Boost productivity, save time

Streamline research and case preparation, helping you to focus on what matters most

### Data security and privacy

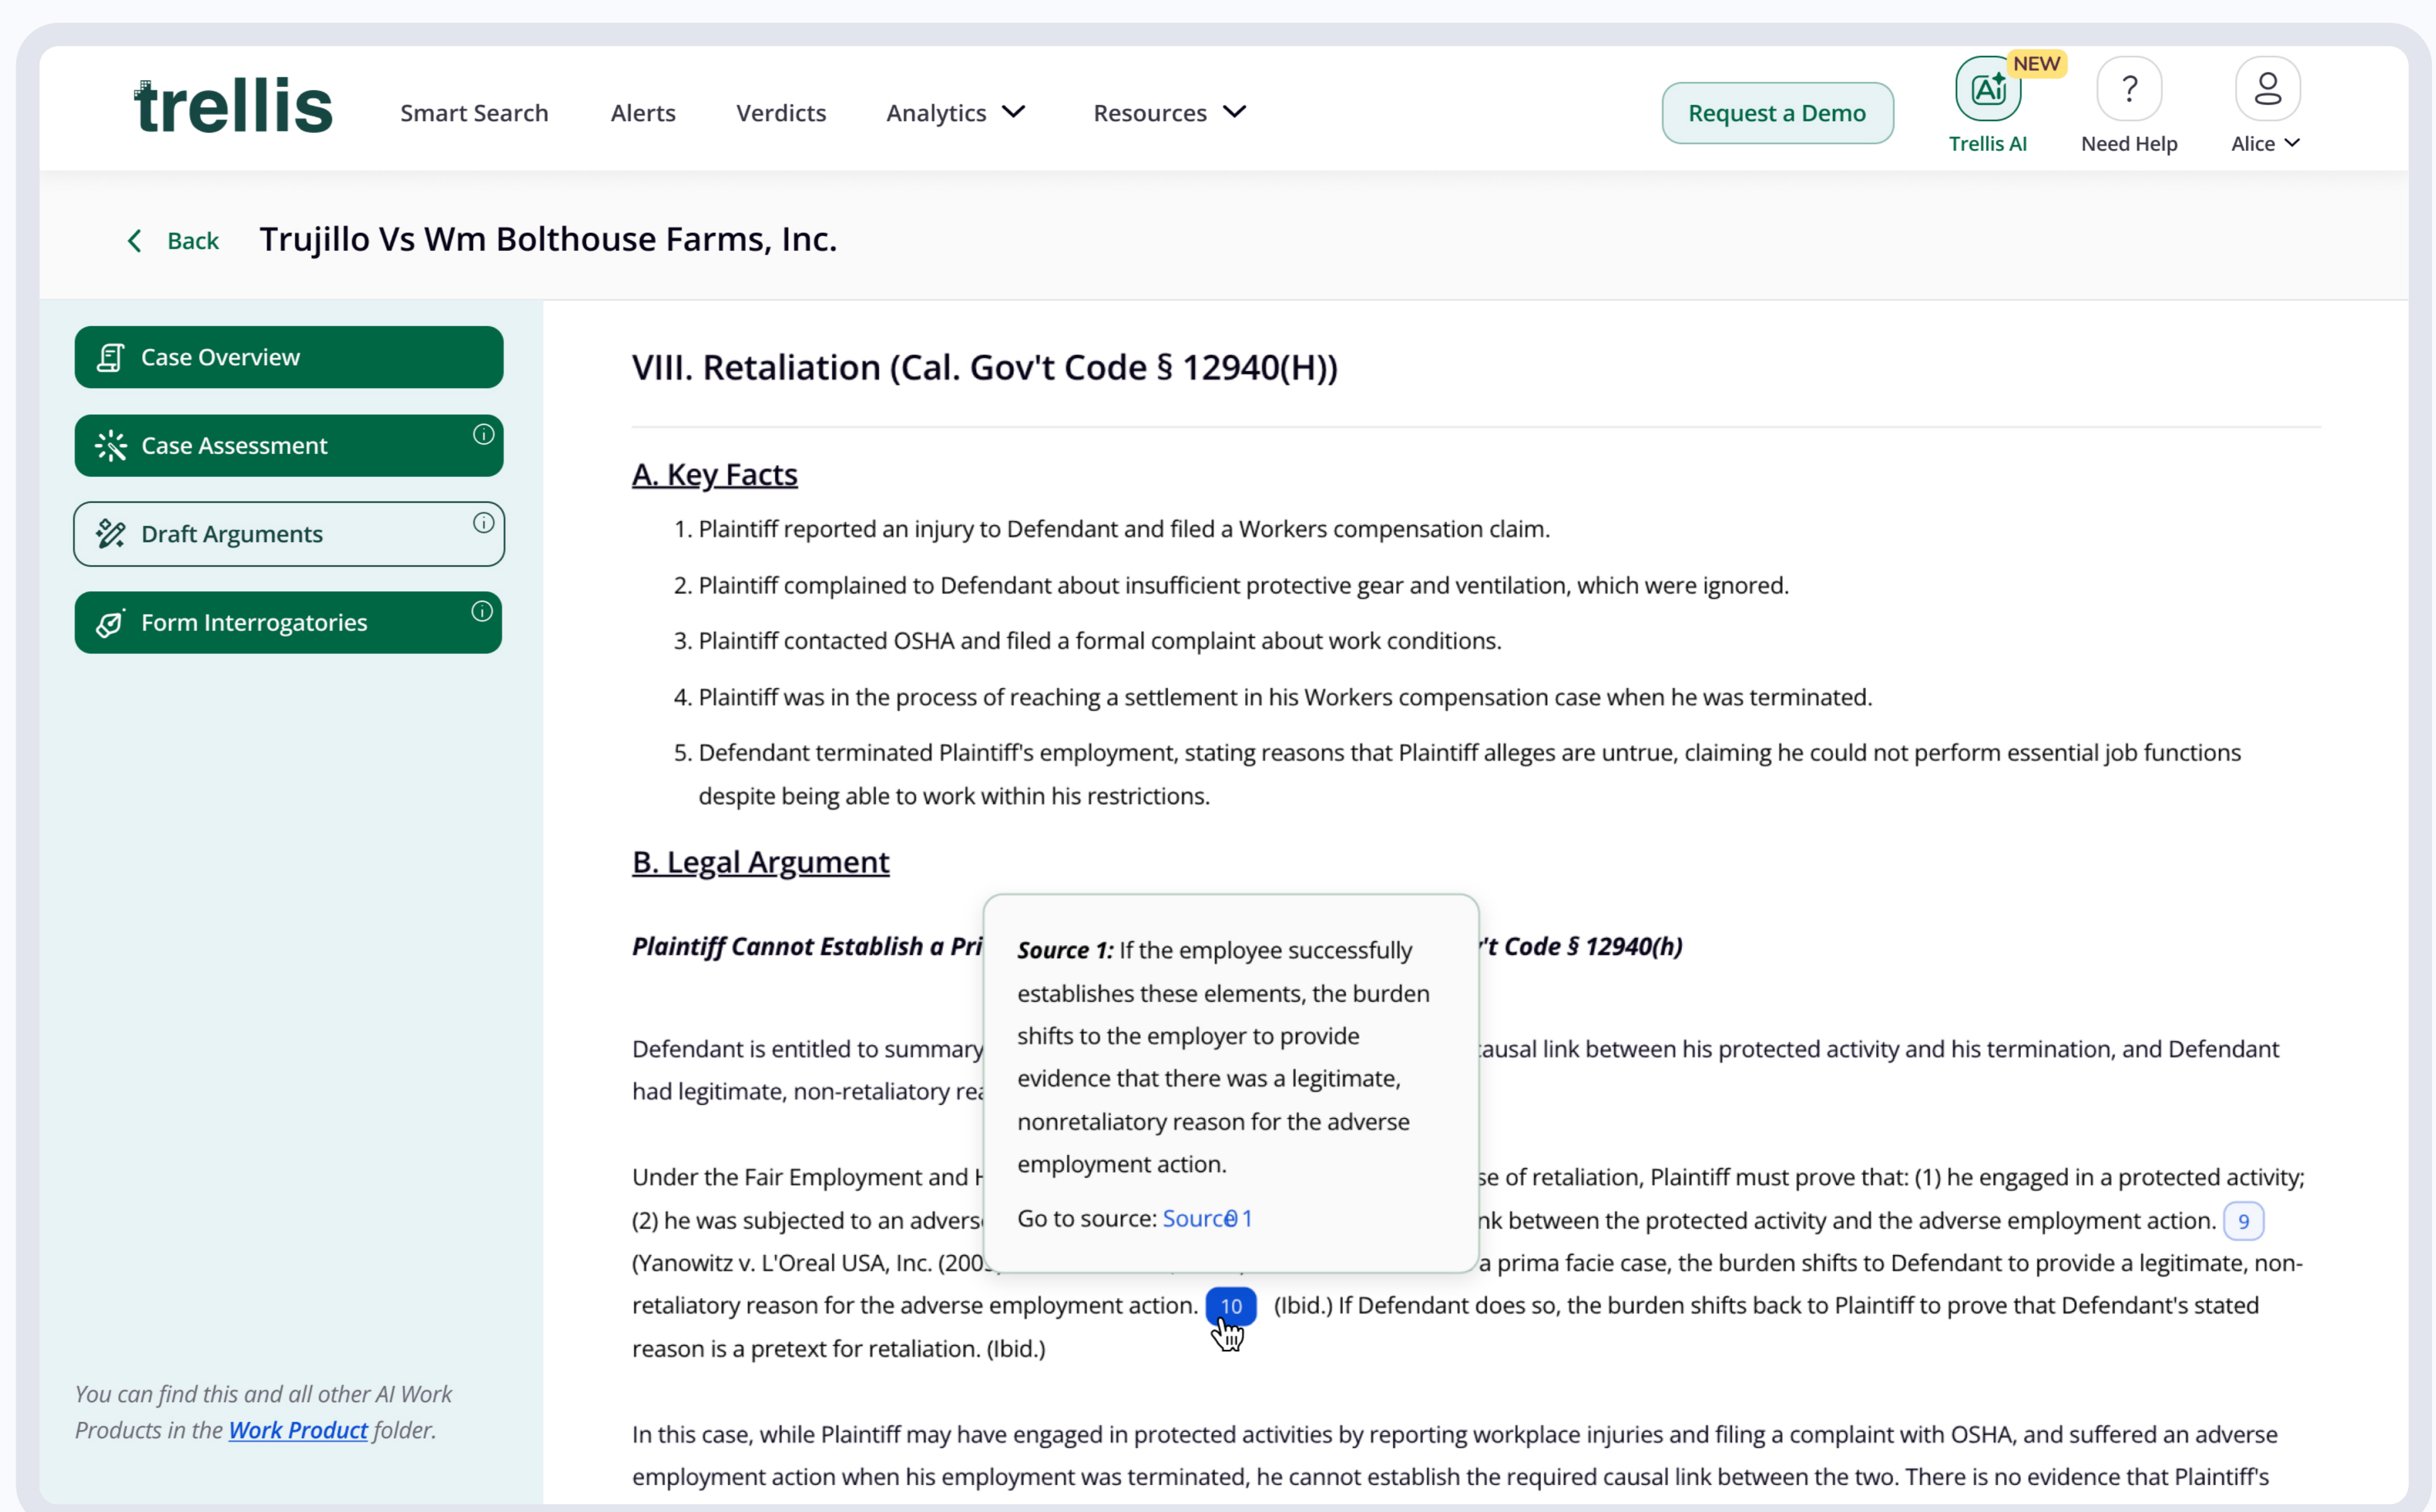

Your information is protected with the highest security measures, ensuring full compliance with privacy regulations.

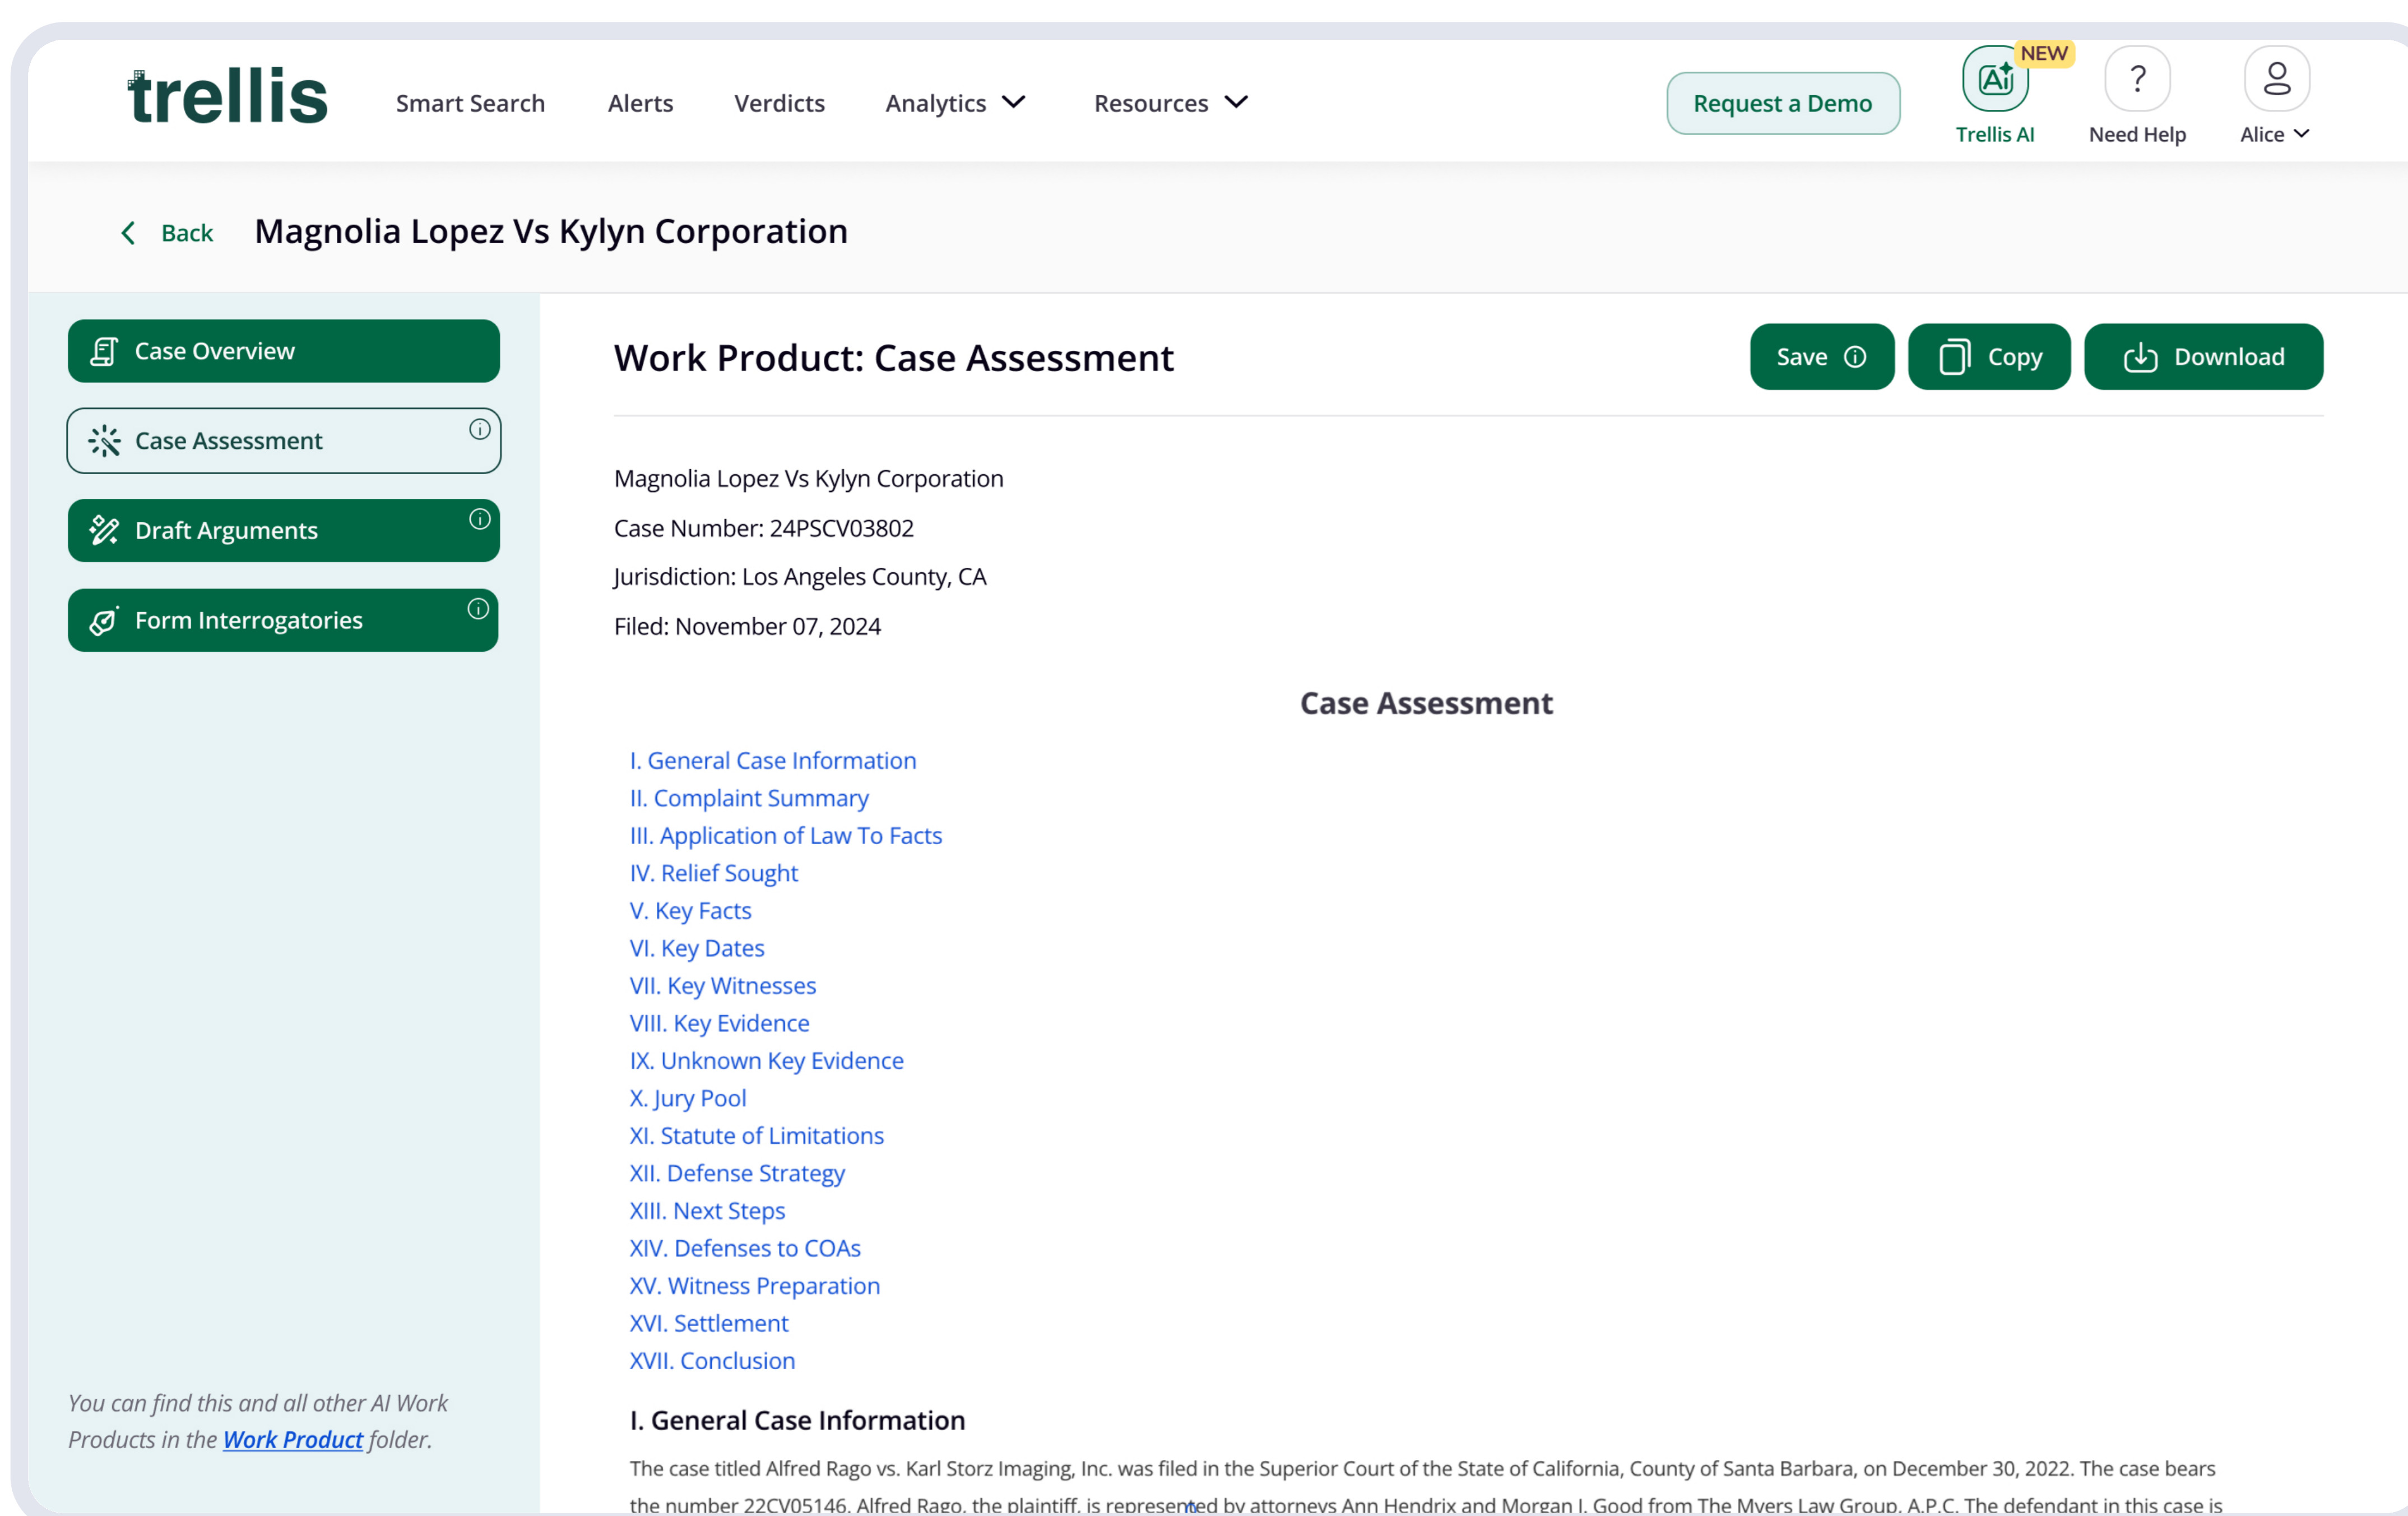

### Built by legal experts

Developed and rigorously tested by experienced attorneys to meet real-world legal needs

## Draft Arguments

*Draft Arguments* is a powerful motion drafting tool that can save hours of work. Trellis AI uses the details and facts of the case to create tailored draft motions that draw upon Trellis' vast database of similar cases to suggest strategic arguments. Each draft incorporates insights from hundreds of thousands of successful trial court motions, offering attorneys an innovative solution that redefines how they approach motion drafting.

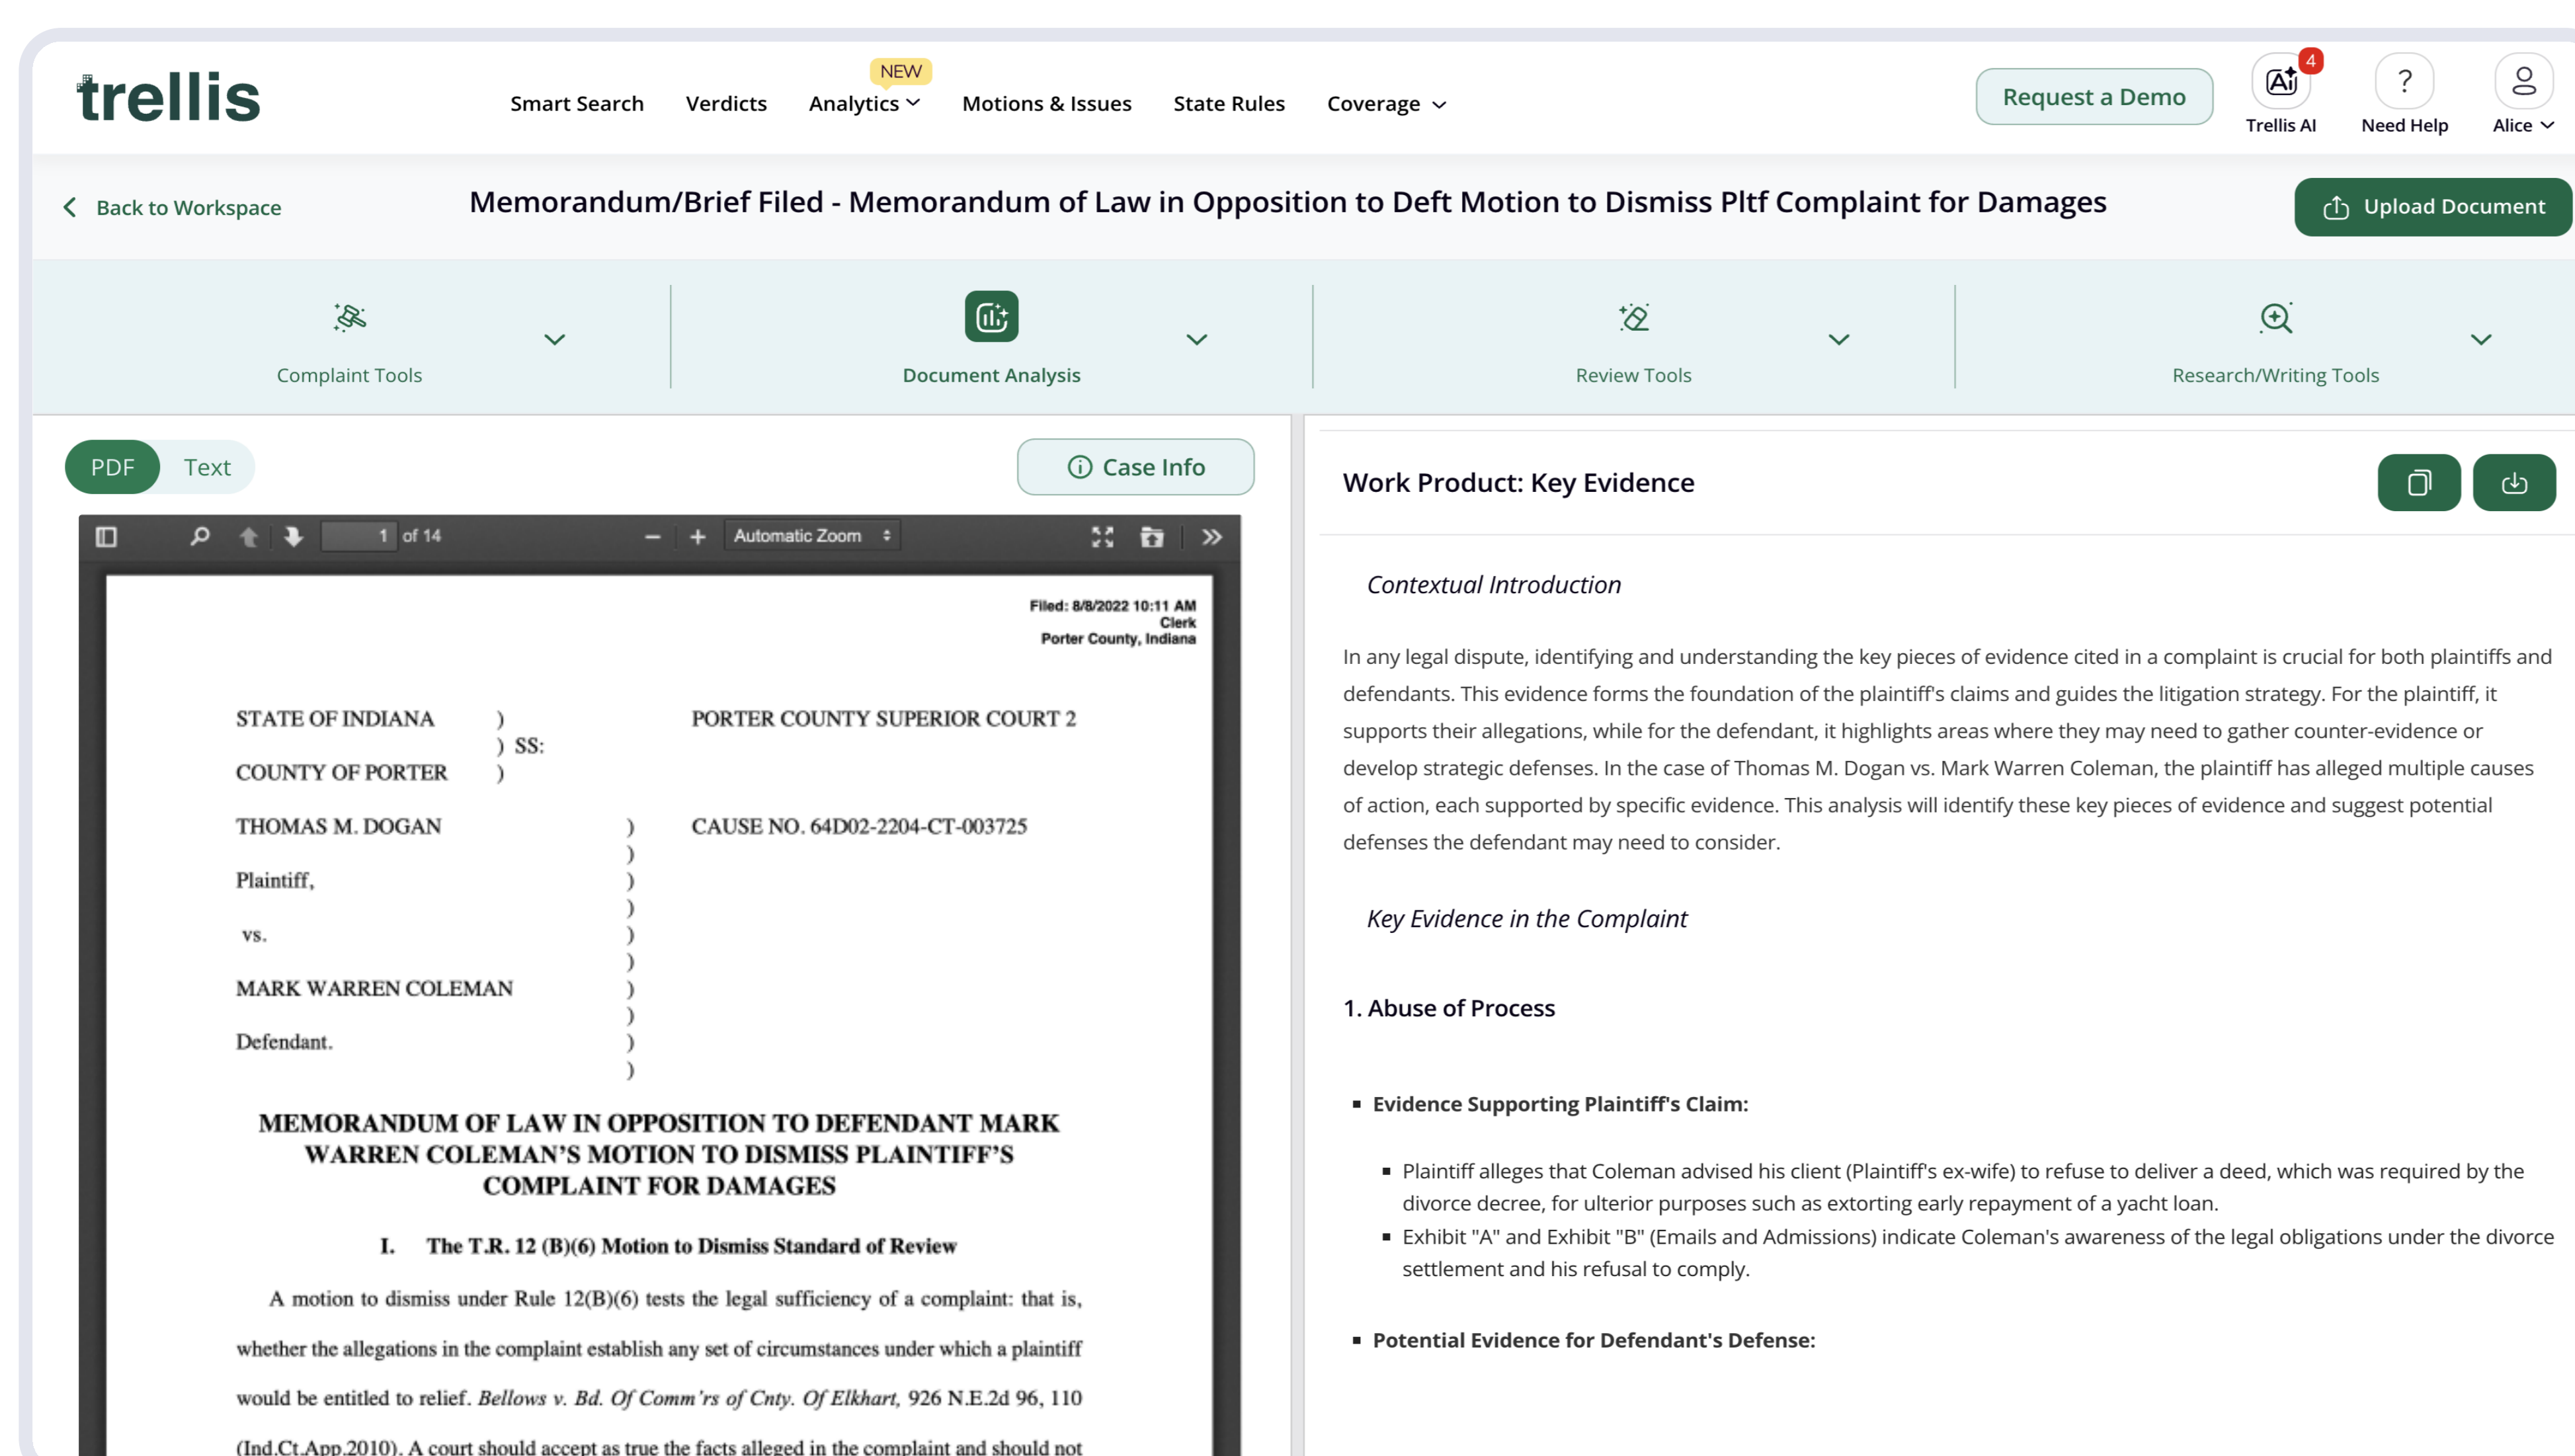

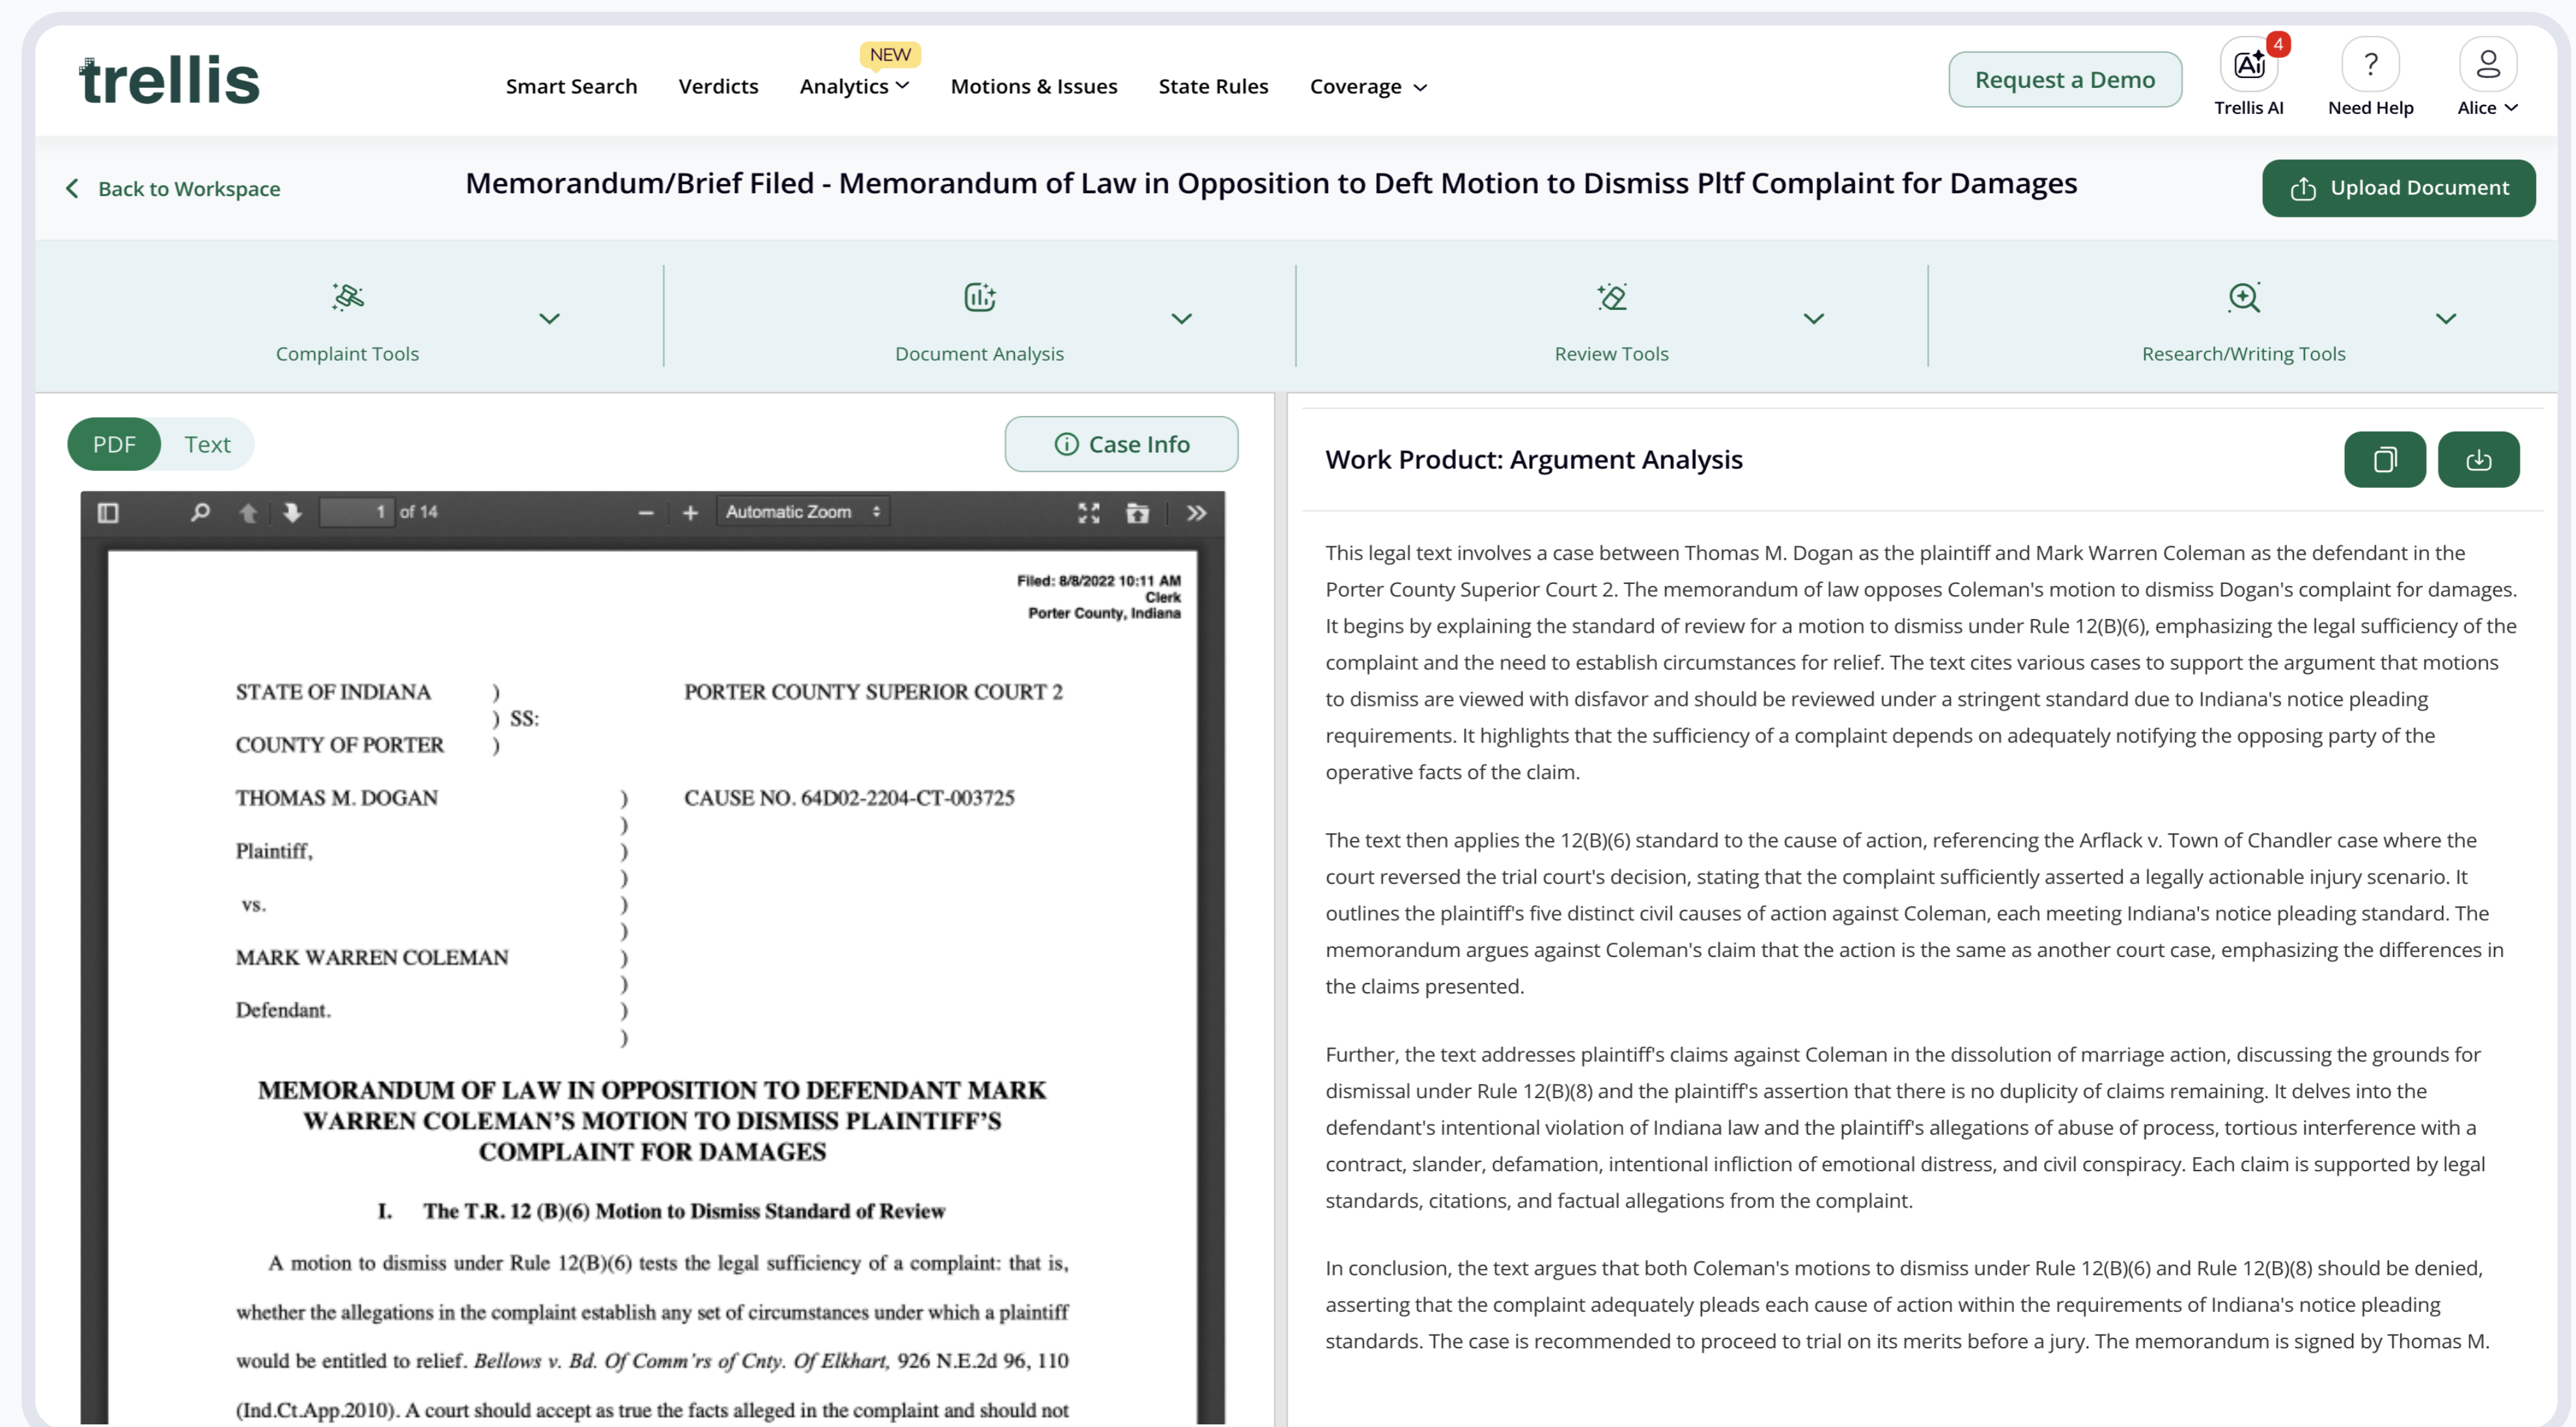

## Case Assessment

*Case Assessment* evaluates key case elements to guide strategic decision-making. Trellis AI examines case facts, claims, and defenses to provide detailed insights into potential outcomes, recommended actions, and risk factors. Each assessment delivers actionable intelligence to inform decisions on case management, settlement strategies, and trial preparation, enabling attorneys to make data-driven choices at every stage of litigation.

## Analyze Argument

This tool identifies and dissects key arguments and evidence in a selected document. It extracts and categorizes the nuances of each argument, delivering comprehensive insights in moments.

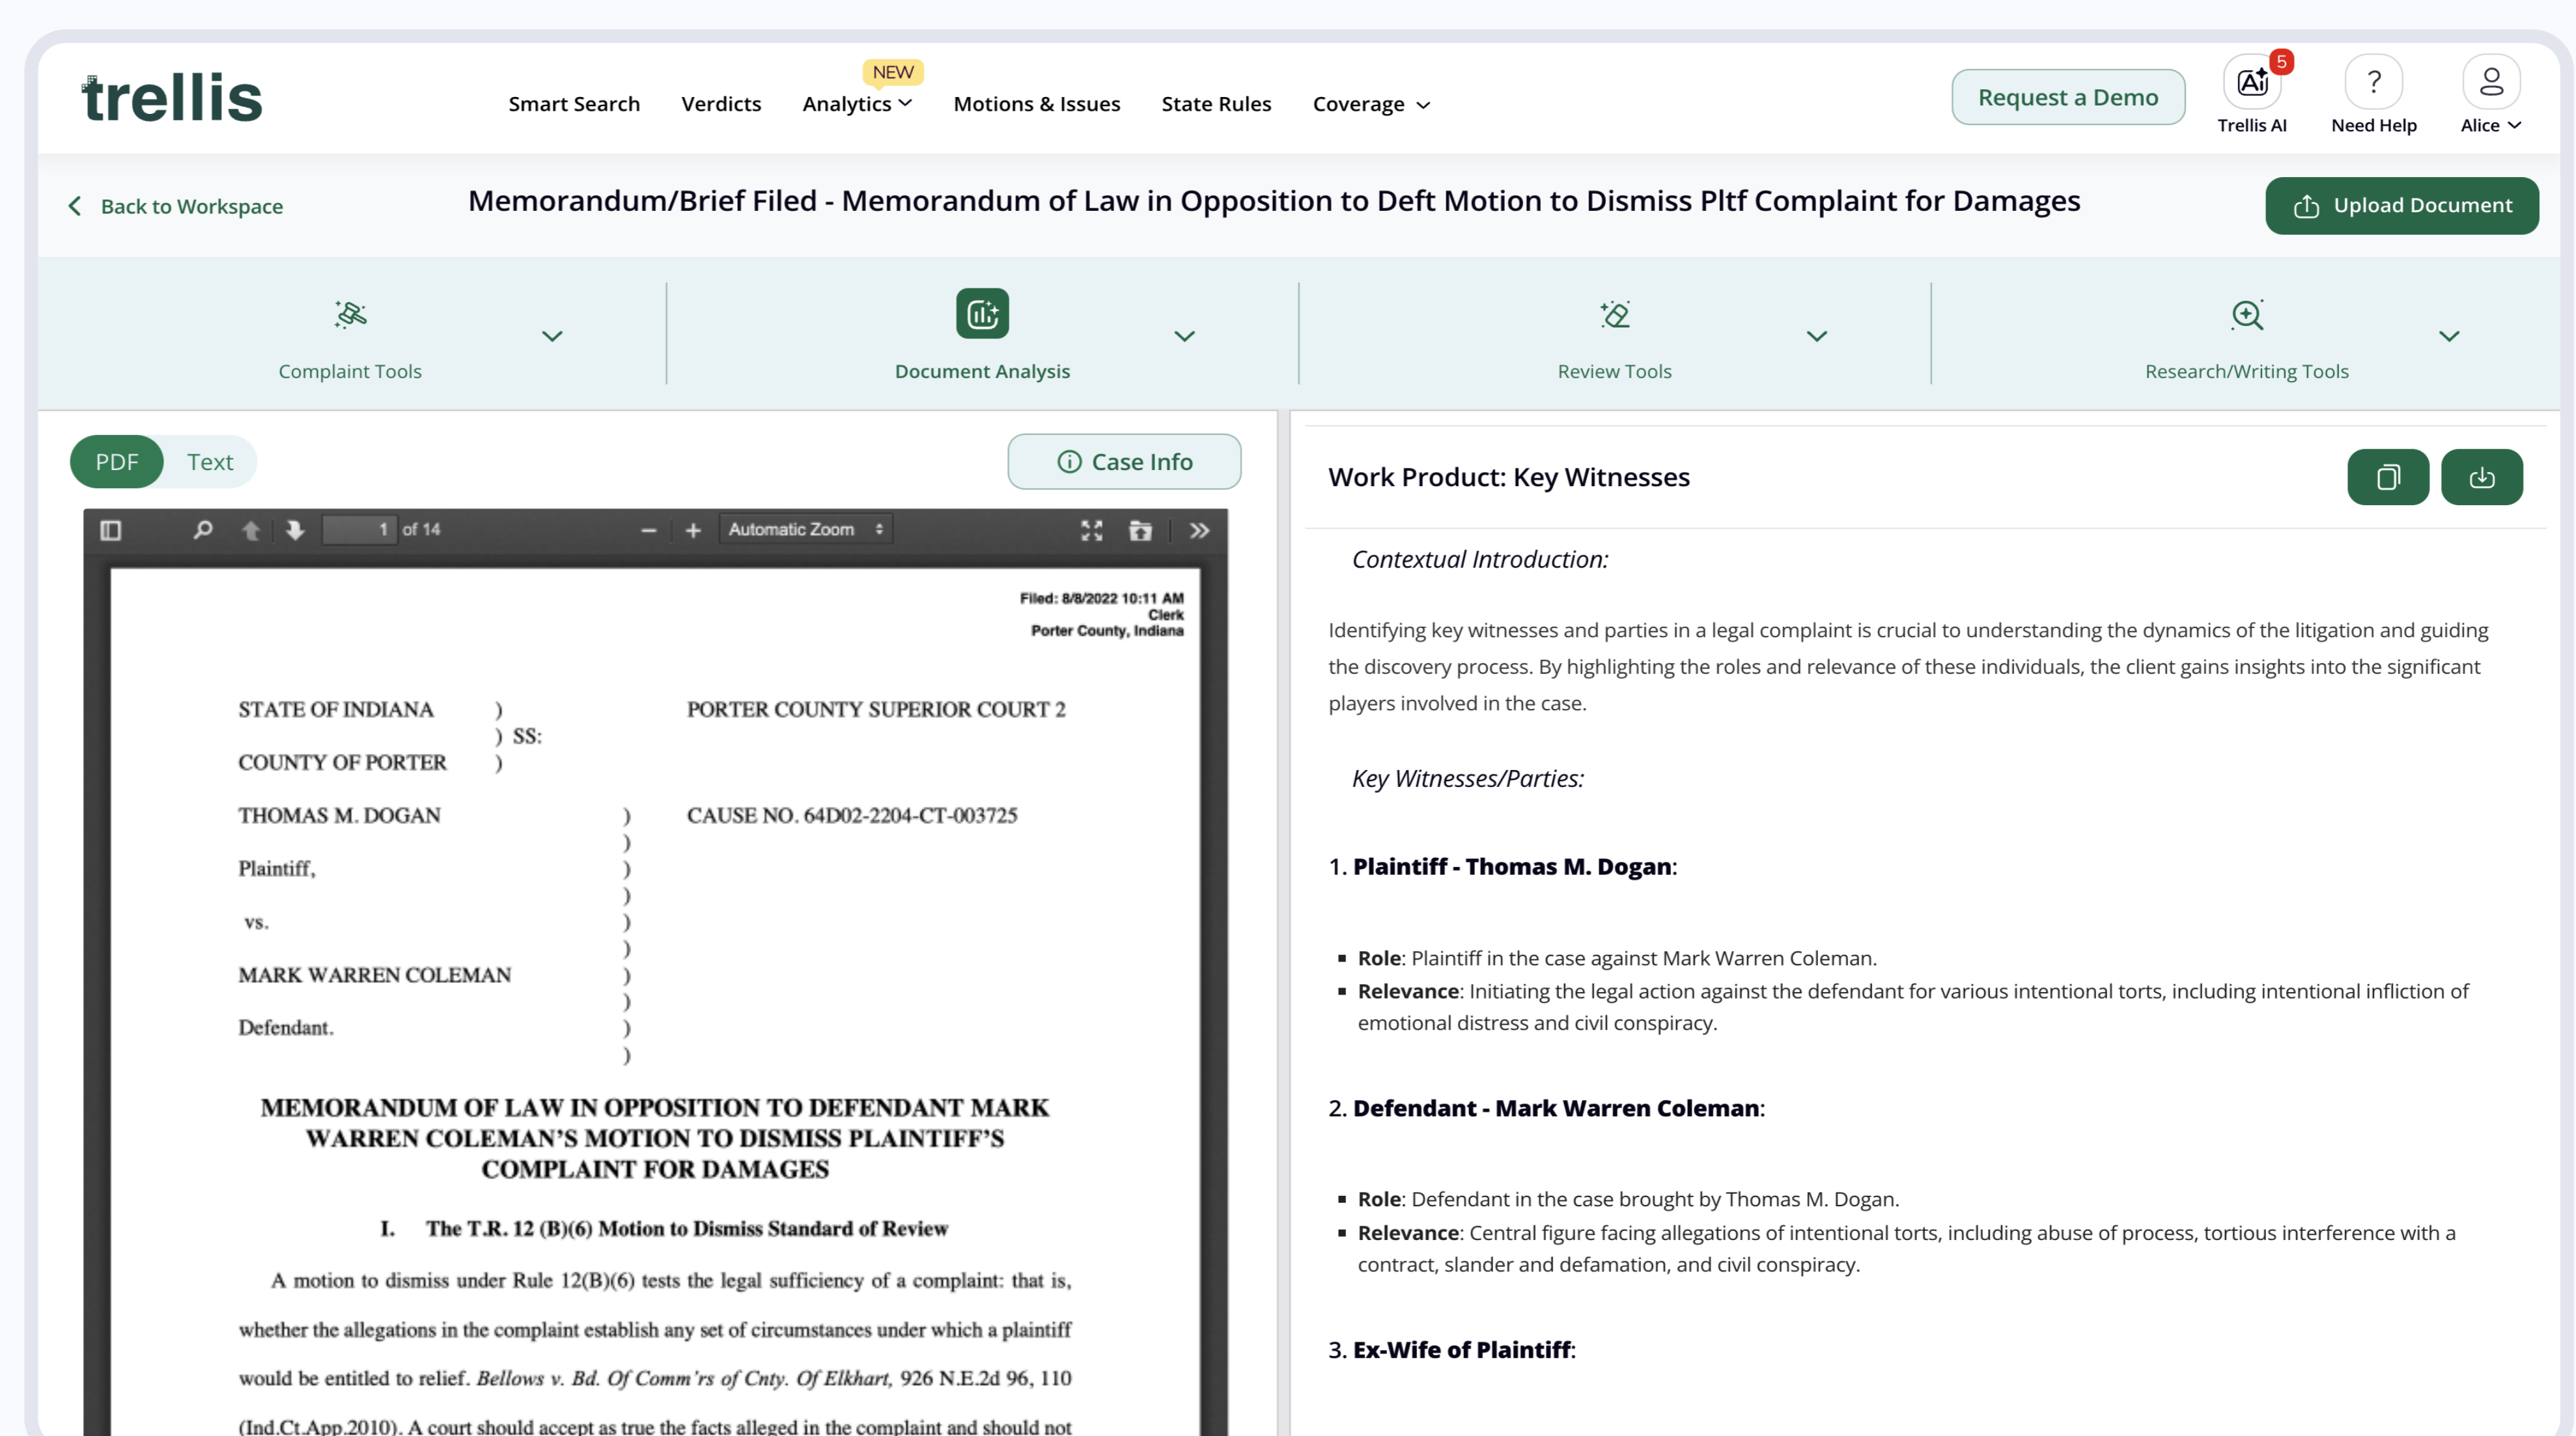

## Key Evidence

This tool identifies and extracts key evidence that supports the arguments made in the document.

## Key Witnesses

This tool identifies parties, detailing their role and involvement within the context of the document's causes of action and allegations.

## How secure is Trellis AI?

All uploaded files are encrypted at rest, ensuring your data remains secure and protected from unauthorized access. Uploaded information and documents are accessible only by the user, guaranteeing that no one else, other than the user, can view their data or responses.

Trellis is committed to the highest standards of security and data protection, following System and Organization Controls 2 (SOC 2) standards to ensure your data is managed securely.

## What sets Trellis AI apart from others?

Trellis AI is built on the largest and most comprehensive trial court data foundation in the US, providing unparalleled access to case data, dockets, rulings, and analytics. Leveraging this extensive database, Trellis AI delivers precise insights for decision-making, case preparation, and litigation strategy, enabling legal professionals to streamline case assessments, motion drafting, and client updates with data-backed accuracy.

## Why not use ChatGPT or ClaudeAI?

Unlike other AI providers that require a steep learning curve, Trellis AI is designed with ease-of-use and speed in mind, meaning you won't have to waste time learning how to master precise prompt engineering. We've simplified the user experience, without sacrificing accuracy or quality, so it's as easy as clicking a button.

## How does Trellis AI handle hallucinations?

Our attorneys have rigorously tested multiple models and thousands of documents to deliver precise and reliable results. However, output should always be reviewed.
